Welcome to the 2016 Buster model year!

The summer of 2015 will be remembered as one of the coldest and rainiest ever. Exactly the kind of summer that really makes one appreciate the inherent carefree and easy to use quality that permeates the Buster model lineup. Especially during a summer like the past one, when the boat is used primarily for practicalities and less for pleasure and fun. For the season 2016 we yet again offer a rich array of novelties: some that are renewed versions of old favourites and some that genuinely break new frontiers.

Of our novelties for the 2016 season, the completely renewed Buster L family is probably the most important product launch, as the Buster L platform has been the most popular open powerboat in the Nordic countries for decades. The new Buster L is available in three configurations: the L1 with a single side console, the L2 with double consoles and the Lx that is the smallest model in the range driven from separate seats. The all new ergonomical console/windscreen assembly offers room for a flush mounted chart plotter on all models, and on the L2 and the Lx there is an optional canvas top and fixed door between the consoles that gives protection from the elements.

The completely new hull without strakes guarantees great planing capabilities through the engine power range, and allows for comfortable passage at cruising speeds. The ingenious integrated canvas garage hides behind the backrest and adds to everyday comfort while using the canvas on L2 and Lx, and on the L1 the canvas garage doubles as storage for rods,

paddles, light masts and other long objects. The Buster Lx is also the smallest boat in the range that can accommodate five passengers beneath the sheltering canvas top.

The new E-Series range of boats with fibreglass decks that we launched a couple of seasons ago, has also been extended for the 2016 season with a new flagship, the Buster Magnum E. The Magnum E hull is based upon the acclaimed, deep V Buster Cabin hull geometry. Introducing a new, bold look & feel to the E-Series, the Magnum E also packs lots of innovative features like single handed opening of the door between the consoles, 1.000 litres of storage space, enhanced social usability, walk through backrest on the aft sofa and category killing large bathing platforms. To further enhance the appealing aesthetics and design, the drivers and codrivers seats are brand new with handrails for the aft sofa passengers integrated into the backrests. Oh, and did I remember to mention that all deck hardware is in hand polished stainless steel and that the standard specification includes most of the options and accessories you would ever need and want.

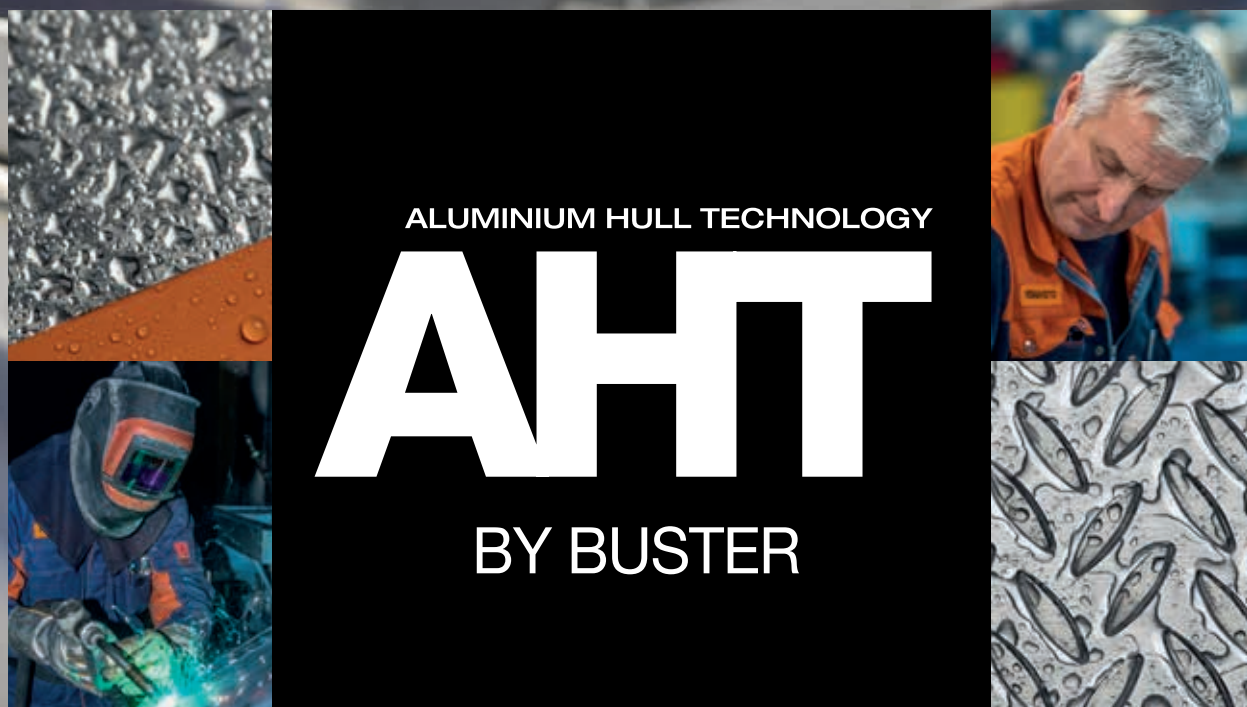

The new Buster XL Pro represents a slightly less innovative approach than the Magnum E. We have taken the excellent and proven XL hull, and cherry picked the best characteristics from the previous models. Thus, the new XL Pro is the first boat in the Pro range with a traditional double console lay out. The aft sofa is constructed with dual folding leaves, so that you can choose either full width seating or

maximise available floor space for fishing and transporting goods. The floor is aluminium like on the other models in the Pro range.

Last but not least of the 2016 novelties we introduce the new Buster S Fish, currently the only model in the range designed exclusively for fishing. The raised floor aft and in the bow allow for unobstructed work areas for the angler, and the two detachable seats allow for safe and comfortable, prolonged fishing sessions. Options include among other things an aerating livewell and a bow mounted electric engine. On top of all this, the hull geometry of the Buster S gives you the handling characteristics of a significantly larger boat - all this in a package that can be transported on a trailer without brakes behind any regular car.

For the season 2016, it gives me great pride and joy to see that the Buster range is in better shape then ever before. We wish all Buster boaters - past, present and future - great moments on water during the 2016 season!

ALUMINIUM BOATS SINCE 1955

AHT – Aluminium Hull Technology by Buster is living proof of the experience and relentless work spanning 60 years that we have committed to in order to make our boats ever better.

Buster is the largest and industry leading Northern European designer and manufacturer of aluminium powerboats. Of over 125.000 boats that we have launched over the past 6 decades, the majority is still in use.

Our design has always been guided by uncompromising goals regarding ruggedness, everyday practicality and seaworthiness. These values, combined with generations of industrial, hand crafted traditions have created a quality level that already carries a legacy of it's own: Buster.

SUPERIOR MARINE ALUMINIUM

Marine aluminium is light but stiff, it tolerates impact, scratches and abrasion without structural deformation. It does not burn, crack, nor does it suffer from moisture penetration. Marine aluminium tolerates extreme temperatures and weather well, so the boating season can be extended from early spring until late autumn.

STURDY CONSTRUCTION AND GOOD PERFORMANCE

The innovative hull solutions, first class materials and continuous on water testing guarantee safe handling, good performance and product longevity.

Our solutions for stiffening the hull make the boat durable and guarantee stable driving characteristics, while keeping the boat light. Our over dimensioned transoms enable large engines, and our carefully designed underwater bodies give consistent and pleasant handling even in adverse weather conditions. Extensive soundproofing guarantee best in class comfort regarding noise levels. Our design department uses modern 3D tools, and in structural engineering we use FEM analysis to simulate real life scenarios. When you add significant amounts of test driving and prototyping, the resulting boat models become legends in their own right.

EVERPRESENT ECOLOGICAL VALUES

Being at the forefront is not only about technology and performance. It also involves responsibility for the environment. We aim to minimize the negative impact of our production also in our material choices.

80% of the raw material in our boats is recycled. The components of a finished boat can be recycled to 90%, because aluminium and plastic parts can be recycled and wooden/plywood parts can be burned. The ecological aluminium used for hull and stringers can be recycled indefinitely. We transport all appropriate scrap material to a recycling plant.

The exceptional durability and longevity of a Buster is beneficial to owner and environment alike. In our structural design we focus on optimally shaped underwater bodies and a low total displacement. This leads to two benefits; good overall fuel economy with a smaller engine, and also lower fuel consumption while trailing the boat behind a car.

VERSATILE AND EASY TO MAINTAIN

A Buster does not need a lot of elbow grease for maintenance. Use Buster Boat Care products for best results. The need for antifouling treatment varies locally; check with your Buster dealer for suitable bottom treatment options. In demanding offshore locations, occasional mechanical cleaning may be needed when AluSafe antifouling is used. However, with a Buster you can run the boat ashore even on a cliff or pebblestones. You can load the boat with luggage or even construction materials without having to be worried about dirt or dents and dings.

Buster is a true multi-purpose boat. Due to different interior layouts and factory installed equipment options it is well suited for daytrips, cruising, fishing, water sports and other hobbies. A Buster also serves as a workhorse for light professional use and heavy commuting.

Buster Magnum M5

The king of aluminium boats

Buster Magnum M5 – when only the best is good enough

LENGTH 7,14 m / WIDTH 2,42 m / ENGINE POWER RANGE 250-350 hp / SEATING CAPACITY 8

BUSTER MAGNUM M5 CONTINUES THE EVOLUTION OF THE MARKET LEADER AMONG LARGE, OPEN, ALUMINIUM POWERBOATS – THE BUSTER MAGNUM.

We have manufactured over 4.000 Buster Magnums in it's various incarnations, and in this fifth generation we have taken a brilliant boat – and further improved it. With 350 hp engine rating it is the most powerful boat in the range. With the Magnum M5 you will not be overtaken often, and the best thing is that there is no need to slow down even if the weather deteriorates. The M5 is the choice of the discerning boater, with performance, seagoing ability and durability to match. The trendy styling, colour and trim also separates you from the masses.

The Buster M5 is suited for all weathers. The electro-hydraulic power steering facilitates driving in demanding circumstances. And the large fuel tank along with the efficient hull maximize the effective range. The extraordinary balance of the hull geometry and trim tabs as standard guarantee stable handling.

The Buster M5 does not forget safety and practicality either. The aluminum floor facilitates transporting tools and

building materials, whereas the full aluminium consoles are carefree for decades to come. The sporty yet sturdy windscreen is popular among passengers as weather deteriorates. The console has room for a 12" chartplotter and the toughened windscreen boasts two windscreen wipers. The M5 also has onboard WiFi so you will be popular among friends and teenage children since you are a mobile hotspot. The new Buster Magnum M5 – when only the best is good enough.

Seating capacity: 8	Weight (without engine): 1080 kg
Max load: 575 kg	Engine power range: 250 – 350 hp
Length overall: 7,14 m	Engine rig length: XL

OPTIONS 
Colours are reproduced as accurately as possible due to restrictions in printing technology.

*The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed - especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster SuperMagnum

Superior detailing

Buster SuperMagnum – need for prestigious speed

LENGTH 7,14 m / WIDTH 2,42 m / ENGINE POWER RANGE 225-300 hp/ SEATING CAPACITY 7

BUSTER SUPERMAGNUM IS THE CHOICE OF THE DISCERNING BOATER WHO ENJOYS SPEED AND ALWAYS AIMS FOR THE BEST, DOWN TO THE MINUTE DETAIL.

Performance is guaranteed by 300 horsepower, and having the most luxurious and comfortable passenger seating available creates a unique Buster-experience that can not be matched!

In addition to speed potential, the SuperMagnum is right at home in rough weather. Even at top speeds over 50 knots our crown jewel demonstrates predictable handling even when heavily loaded. The ergonomic, adjustable driver's and co-driver's offshore seats provide good directional stability sideways. The leather clad tilt steering wheel and high end audio system add a dash of luxury to this powerful Buster.

The Buster SuperMagnum is built for speed. Deck hardware made of stainless steel is a given. No wonder that we way exceeded our sales targets making the SuperMagnum a category killer in the Nordic countries. Maybe it's your turn this season?

Buster Magnum

The most popular large aluminium boat in the Nordics

Buster Magnum; formidable and comfortable yet with performance and ambience

LENGTH 6,90 m / WIDTH 2,42 m / ENGINE POWER RANGE 100-225 hp / SEATING CAPACITY 8

BUSTER MAGNUM IS ONE OF THE MOST DESIRABLE POWERBOATS ON THE MARKET.

When we launched the first generation Magnum in 1994, many felt that the boat was unnecessarily large and powerful, and still in 2015 a Buster Magnum is an imposing presence on the water. As the most sold boat in it's category it is an integral part of the landscape at sea and on the lakes. It guarantees comfortable passagemaking for up to eight passengers, while being a powerhouse in the range with speed potential close to 50 knots. The Buster Magnum is the active boaters dream, and the wide power range facilitates finding a suitable combination for your needs.

Despite it's hefty proportions the Magnum is an easy boat to handle even in demanding conditions. The canvas top that is housed in a fixed garage offers protection for up to six passengers. Ample stowage facilitates various on-and-off water hobbies and boosts comfort. The non reflective console top also aids visibility at night.

The Buster Magnum effortlessly adapts to many kinds of boating needs. It is equally suited for summer cruises and fishing alike. Wide bathing platforms, sturdy swim ladders and the optional water sports bracket are but a few reasons why over 4.000 boat owners have chosen Buster Magnum since it's launch in 1994.

Seating capacity: 8	Weight (without engine): 928 kg
Max load: 620 kg	Engine power range: 100 – 225 hp
Length overall: 6,90 m	Engine rig length: XL

Buster XXL

An pure sports boat

Buster XXL: Spacious, nimble, sporty!

LENGTH 6,29 m / WIDTH 2,17 m / ENGINE POWER RANGE 90-150 hp / SEATING CAPACITY 7

BUSTER XXL IS A PURE, SPORTS BOAT FOR A DRIVER THAT ALSO APPRECIATES ROOM ONBOARD.

Based upon the highly acclaimed XL hull geometry, the new XXL is right at home at high velocity in heavy seas. The new XXL is sea kindly at speed, and transports seven persons with gear effortlessly. The open deck plan is created for activity filled days at sea, regardless of whether you are cruising or fishing.

The Buster XXL is the smallest boat in the range that has deck hardware and railings in stylish stainless steel. In addition to being sporty, the new XXL is also practical – hence the spacious deck areas. This boat is also designed for socializing – the cockpit table adds to comfort and pleasure when you are not out at sea.

The Buster XXL is sleek and streamlined and tons of fun to drive. The aft sofa is spacious, and it is easy to move about

onboard. The integrated canvas garage and the new consoles add to comfort in everyday use. The Entertainment package guarantees that your journey will pass pleasantly while listening to your favourite music. The new Buster XXL is a boat for those who appreciate speed AND style.

Buster XL

The compact but grand Buster

The Buster XL – frugal and spacious

LENGTH 5,94 m / WIDTH 2,17 m / ENGINE POWER RANGE 70-115 hp / SEATING CAPACITY 7

BUSTER XL IS THE SMALLEST OF THE LARGE BUSTERS.

It combines big boat characteristics in a thrifty category. The XL is a stylish and sturdy all purpose boat, that is well suited for leisure and utility. Like all Busters, it represents a carefree choice, that provides a touch of luxury into your boating life.

The XL is the choice of the quality conscious boater who values practicality and overall economy. The wrap around glass windscreen with wipers contributes to comfort and safety. Ample stowage and rope lockers make boating a pleasure also for passengers. The audio system in the ENTERTAINMENT-package guarantees comfort during longer passages.

The Buster XL, deservedly, is one of our most popular models. The unsinkable and streamlined XL is an assertive

choice for commuting as well as leisure. The comparatively large bathing platforms are built for fun! No wonder that this is one of our best selling models. The trust we have earned is a matter of honour for us.

Seating capacity: 7	Weight (without engine): 620 kg

Buster X

Modern, multi-purpose Buster

Buster X: a boat that adapts to your needs

LENGTH 5,25 m / WIDTH 2,01 m / ENGINE POWER RANGE 50-70 hp / SEATING CAPACITY 7

BUSTER X IS A VERSATILE ALL-ROUND BOAT, THAT ADAPTS TO YOUR NEEDS.

The versatility is precisely why it is one of the most popular boats in the range. Registered for seven persons, Buster X is flexible when you need it to be. All the seat/storage boxes including the aft sofa can easily be removed. With optional accessories you can customize this Buster to fit your needs.

The Buster X is an excellent choice for the fisherman. The open, spacious deck arrangement facilitates moving around in the boat. The roomy interior increases the comfort of the skippers friends, and make trolling easier. The sea-going hull is suitable for extended fishing trips. Sturdy railings and anti-skid treated footsteps make for safe boating even in rainy conditions. For the night, you can drive the boat straight up even on a rocky shore.

The Buster X has NFB steering for additional comfort. This makes driving lighter when your destination is further away.

The large, 100 litre, fixed fuel tank is the biggest in it's category. The Buster X is a straight A partner for the boat owner who appreciates activity during their time off work.

Seating capacity: 7

Max load: 535 kg

Length overall: 5,25 m

Buster Lx

Small costs, big fun

Buster Lx can be tailored to fit Your needs

LENGTH 5,13 m / WIDTH 1,99 m / ENGINE POWER RANGE 40-60 hp / SEATING CAPACITY 6

BUSTER Lx IS AN IMPROVED FAVOURITE IN MANY RESPECTS.

Not least because it combines features that usually can be found only on much larger boats. The new Buster Lx is the smallest boat in the range that is driven from separate seats, and the compact consoles with wrap around wind screens give shelter for up to five passengers. In case of rain or inclement weather, five persons fit comfortable beneath the canvas top.

The integrated canvas garage that can be found on other Buster models is now standard on the new Buster Lx as well. The canvas garage makes everyday boating life easier, and protects the canvas top from moisture and UV radiation when not in use. At the same time the navigation light mast has a dedicated storage location inside the lid of the canvas garage. The new Buster Lx is also improved in terms of ergo-nomy and seaworthiness. The new hull geometry gives a comfortable ride regardless of weather, while the optional, flush mounted 7" chart plotter contributes to safety - regardless of whether you commute, fish or are into watersports. The comprehensive storage options can be customized due to the removable seat-storage boxes.

Over time, the Buster Lx has been a versatile, sporty favourite - and the new model continues this tradition. The fixed

53 litre fuel tank, rainwater draining cockpit, new step bow and the removable aft sofa are further arguments that bode well for future commercial success. Regardless of how the boat is used, the new consoles with wrap around wind-screens create a uniquely safe and sheltered cockpit. The new step bow allows for more storage space while facilitating loading and passage. It does not suit the nature of this boat to lie in port, and with the right options and accessories the new Buster Lx offers the active boater the option to extend the boating season.

Seating capacity: 6	Weight (without engine): 440 kg
Max load: 460 kg	Engine power range: 40 – 60 hp
Length overall: 5,13 m	Engine rig length: L

Buster L

L as in Light and Lively

The most popular boat in the Nordics, for a reason

LENGTH 5,13 m / WIDTH 1,99 m / ENGINE POWER RANGE 30-50 hp / SEATING CAPACITY 6

BUSTER L IS PROBABLY THE MOST IMPORTANT NOVELTY FOR THE SEASON 2016.

The Buster L has topped sales statistics for years, and due to the heritage we have gone all in regarding development work on this new model. We have further improved seaworthiness, versatility, functionality on board and stowage spaces. Like its predecessor, the new Buster L is aptly suited for outings, fishing and pure commuting alike. The new model sports an integrated canvas garage and new ergonomic consoles with wrap around windscreens that efficiently shelter from rain and spray. The console is designed for flush mounting a 7" chart plotter and is ergonomically optimized for driving both sitting down and standing up. In the drivers seat You will notice that there is more space, so that even large drivers are comfortable with foul weather gear on. The new hull has a lower planing threshold especially with a heavily loaded boat.

You can order the new Buster L in standard, twin console configuration (L2), in which case passengers on the aft sofa get full protection from the windscreens and the fixed, two part door between the consoles (accessory). On the L2 you also seat 3 passengers comfortably with the canvas top up in case of rain or inclement weather. Should You choose to maximise available loading space, the single console configuration (L1) gives You ample floor space for transporting anything and everything conceivable. The new, removable aft sofa also makes the fisherman happy as You can free up the

aft corners of the boat at will; You just remove the aft sofa and leave it ashore for the duration of Your fishing expedition. The integrated canvas garage houses the canvas on L2, while it can be used for rods, paddles and such on L1. On both models the canvas garage lid has a dedicated storage arrangement for the navigation light mast.

Buster designs all boats for maximum flexibility and adaptability. Due to the removable aft sofa and the removable seat-stowage boxes the new Buster L can be a safe, spacious commuter, a small sportboat for summer outings or a pure transport boat. The improved handling characteristics of the hull also give an elevated sense of security as weather deteriorates. The new bow with a built in step, adds storage while facilitating boarding and loading through the bow. The new Buster L is created to inherit the "best in class" title from its predecessor.

Seating capacity: 6

Max load: 460 kg

Length overall: 5,13 m

Width: 1,99 m

Draught: 0,29 m

Buster M

A versatile boat with Multiple personalities

M as in multi-functional

LENGTH 4,80 m / WIDTH 1,85 m / ENGINE POWER RANGE 30-40 hp / SEATING CAPACITY 5

Buster M

BUSTER M IS PERFECT FOR THE SUMMER COTTAGE AND FOR CALM FISHING TRIPS.

The previous Buster M became a family favourite due to simplicity and fuel efficiency. We have further improved this basic concept. Buster M is well equipped for it's size. A large number of options and accessories allow you to personalize the boat according to your needs. The M has space for a flush mounted chart plotter and ergonomic placing of controls, instruments and compass. The avid fisherman will appreciate the integrated canvas garage which is seldom found on boats in this size range. The canvas garage also doubles as storage for fishing rods. Furthermore, the aft sofa can easily be removed for more fishing purposes. More stowage is available beneath the seats.

The consoles with wrap around wind screens give the driver and passengers excellent shelter. The M is delivered in double- and center console configurations. On the M2 you have an optional, fixed, two part door between conso-

les which gives you even better shelter from the elements. Three persons travel in comfort beneath the canvas, while the integrated canvas garage increases ease of use. The improved handling guarantees a comfortable trip for all aboard. The Buster M is a uniquely comfortable and versatile family boat.

Seating capacity: 5

Max load: 385 kg

Buster S, Scc

Uncomplicated boats for the summer cottage

Buster S and Buster Scc for fishing and light transports

LENGTH 4,61 m / WIDTH 1,88 m / ENGINE POWER RANGE 20-30 hp / SEATING CAPACITY 4

BUSTER S / Scc ARE THE SMALL WORKHORSES OF THE RANGE.

They are extremely well suited for, among other things, lake fishing. Due to our unique hull design, they are easily driven by 20–30 hp engines. For laying and lifting nets, they can also be rowed. The sisters are designed for the boater who appreciates stability and security without frills.

The sisters are very stable and roomy considering their size. The Scc feels like a larger boat due to the deck arrangement. The S comes with the mid seat as standard. Additional comfort is provided by the optional cushions. Both models have the tried and true plastic Buster console. The Scc can also be driven while standing which allows better visibility and flexibility when the going gets rough.

The Buster S and Scc are all weather boats. Both models can be piloted from beneath an optional canvas top, and lockable storage allows you to leave your equipment aboard.

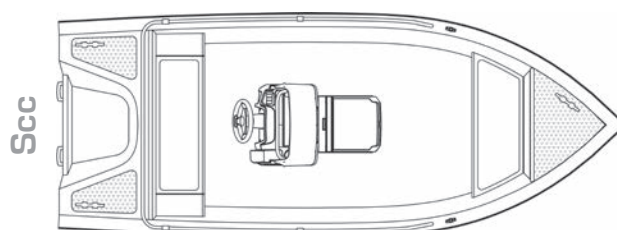

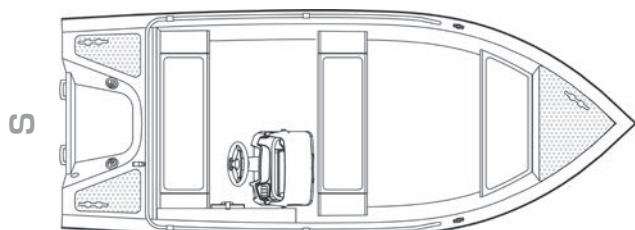

Seating capacity : 4	Weight (without engine):
Max load: 310 kg	259 kg [S], 280 kg [Scc]
Length overall : 4,61 m	Engine power range: 20-30 hp
Width: 1,88 m	Engine rig length: L
Draught: 0,19 m	Design category: C
V bottom angle: 15°	Maximum speed: 25 knots*

STANDARD EQUIPMENT

- Cable steering
- Steering console, windshield
- Detachable middle seat [S]
- Railings
- Battery compartment
- Main switch with automatic fuses
- Automatic bilge pump
- Light mast, detachable
- Power outlet 12V
- Seat-stowage box 45 l [Scc]

ACCESSORIES

- Canvas top/harbour cover [S]
- Locking set (locking cable, Abloy-locks 3 pcs) [S]
- Cushion set
- Harbour cover [Scc]
- Targa [Scc]
- Bow rail, left
- Mounting for echo sounder transducer
- Compass
- Locking set (locking cable, Abloy-lock 1 pc, one key system) [Scc]

*The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed - especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster S Fish

The perfect fishing boat

The new Buster S Fish - a handy boat for angling and vertical jigging

LENGTH 4,61 m / WIDTH 1,88 m / ENGINE POWER RANGE 20-30 hp / SEATING CAPACITY 3

BUSTER S FISH IS THE FISHING COMPANION IN THE BUSTER FAMILY.

It is equally suited for lakes and coastal waters, and due to the unique hull shape it is economically propelled by 20-30 hp engines. With the optional bow engine, the S Fish can be anchored through skyhook, or set to drive a predetermined route (provided that your chartplotter supports this functionality) so that you can concentrate fully on fishing. This boat is designed for the discerning fisherman who appreciates both fishing functionality and all weather ruggedness and robust workmanship.

The S Fish is stable and spacious for its size. The covered bow deck and general arrangement on the raised aft deck allow for ample storage and safe working areas for fishing. The flexible storage solutions enable installing an optional livewell with aerator, and integrated plastic storage boxes. The S Fish has 2 fastening points for removable fishing chairs; one in the bow and one in the aft. One removable fishing chair with seat post is included in the standard equipment, and the second one can be ordered as an option. The rod box fits

8.6 ft rods ready for use. The proven console can also be fitted with windscreen.

The Buster S Fish is an all weather fishing boat. The seakindliness of the proven Buster S hullplatform is unbeatable in this size range, and the lockable stowage spaces add security for storing equipment. Due to its light weight the boat can be stored and towed on a trailer without brakes with a normal car.

Seating capacity : 3

Max load: 310 kg

Length overall : 4,61 m

Width: 1,88 m

Draught: 0,20 m

V bottom angle: 15°

Buster XS, XSr

Practical boats for the entire family

Buster XS/XSr - durable, safe and easy to maintain boats
for local adventures

LENGTH 4,15 m / WIDTH 1,65 m / ENGINE POWER RANGE 6-20 hp / SEATING CAPACITY 4

BUSTER XS AND IT'S SIDE CONSOLE SISTER XSr ARE THE BOATS OF CHOICE FOR LOCAL NEEDS.

Durability, stability, predictable handling, and the safe, unsinkable structure guarantee that boating is pleasant even if you are less experienced.

Due to their sturdy construction and years of product development, these boats display predictable handling in all weather conditions. Even the Sunday boater has an easy time with harbour and landing manoeuvres. The anti-skid treatment on the bow deck and handles fore and aft facilitate moving around on the boat – even for the young ones. Lockable stowage compartments keep your equipment safe. Upholstered, water repellent seats make passages pleasant. On the XS, handles on the inside add comfort and safety.

Buster XS and XSr are the uncomplicated and utilitarian boats in the range. They do not require registering in the

Nordic Countries, and the aluminium hull only needs regular washing with fresh water. The boats are easy to handle on water and can be trailed behind a regular car on a trailer w/o brakes (local regulations and applicable laws to be followed).

Seating capacity: 4

Max load: 310 kg

Length overall: 4,15 m

Width: 1,65 m

Draught: 0,18 m

V bottom angle: 10°

- Adapter for changing rig height [XS]
- Locking set (locking cable, Abloy-locks 3 pcs)

*The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed - especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster Mini

A Buster even for the young ones

Buster Mini – engine and oars alike

LENGTH 3,88 m / WIDTH 1,49 m / ENGINE POWER RANGE 2-8 hp / SEATING CAPACITY 3

BUSTER MINI IS A FULL ALUMINIUM FAMILY BOAT, THAT CAN BE ROWED OR DRIVEN BY OUTBOARD ENGINE.

Depending on your choice, you can equip it with an electrical or combustion engine or alternatively oars. As it only weighs 100 kg, it can easily be handled ashore. Winter haulout is a breeze as you can turn it upside down and leave it for the dark, cold season. Being unsinkable it is a safe choice for the less experienced.

The Buster Mini is an excellent choice for the summer cottage, for fishing, small transportations or as a tender to a bigger boat. Rain doesn't impede it, because the Easy Bail (pat.) bailer empties the boat both ashore and under way. Due to it's full aluminium construction, the Buster Mini does not require much in terms of maintenance. The occasional wash with fresh water is enough. Compared to a GRP boat, the Buster Mini is truly a Carefree Choice!

Though the Buster Mini is the smallest boat in the range, it can carry three passengers with luggage in it's surprisingly

spacious interior. Three upholstered seats guarantee comfortable trips even when going slow. The Buster Mini is the only boat in the range specifically designed with rowing in mind. It can be carried by two adults, and for longer trips it can be trailed behind a small car on a trailer w/o brakes (local regulations and applicable laws to be followed).

Seating capacity : 3

Max load: 235 kg

Length overall : 3,88 m

Width: 1,49 m

Draught: 0,18 m

V bottom angle: 10°

Weight (without engine): 104 kg

Engine power range: 2-8 hp

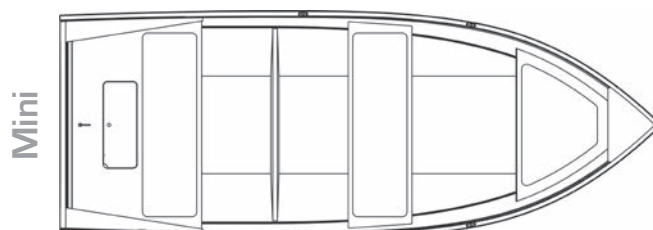

Engine rig length: L

Design category: D

Maximum speed: 17 knots*

ACCESSORIES

- Rowing set (one pair of oars, one pair of oarlocks)
- Bracket for short rigged engine
- Harbour cover

*The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed - especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

Buster Cabin E

Commuting boat with overnighting option

The Cabin E gets you there comfortably all year round in all weathers

LENGTH 6,92 m / WIDTH 2,43 m / ENGINE POWER RANGE 115-250 hp / SEATING CAPACITY 8

BUSTER CABIN E IS THE RIGHT CHOICE FOR YOU, IF THE BOAT FULLFILLS MORE FUNCTIONS THAN JUST TRANSPORTATION AND UTILITY.

The boat is designed for those who journey far and during adverse conditions, spending longer times onboard than the typical cottage commute. The spacious interior carries up to eight, and temporary overnight accommodations are available for two.

The standing room interior is designed to be pleasant and airy. The glass roof and panorama views give excellent visibility in all directions. Noise insulation has also been further improved, as the Cabin E is the least noisy boat in the range. With fall fishing expeditions in mind, the on deck lighting is planned with reduced light conditions in mind. When night falls, the driver's and co-driver's seats fold down to combine with the aft seats, creating two comfortable, full length berths.

The Buster Cabin E is an all weather commuter that is comfortable even in rough weather. The seagoing hull with it's deep

V section and thick, 5 mm bottom plate has been proven by various authorities in Northern Europe. Due to the optimized aluminium hull, the Cabin E is a stable, all weather companion. With it's wide power range it's easy to find a combination that gets you to your destination safely, comfortably and on time.

Seating capacity : 8

Max load: 855 kg

Length overall: 6,92 m

Draught: 0,35 m

Buster Magnum E

The newest member of the Royal family

Buster Magnum E - when style is paramount

LENGTH 6,43 m / WIDTH 2,47 m / ENGINE POWER RANGE 150-225 hp / SEATING CAPACITY 8

BUSTER MAGNUM E IS AN UNCOMPROMISING TRENDSETTER.

We have harnessed 50 years of experience, and the insights gained from building 4.000 Magnums towards introducing a worthy, GRP decked member into the royal echelons of aluminium boats - the Buster Magnum family. Innovations like true walkthrough bow and aft sections, single grip door opening/closing mechanism between the consoles, the largest bathing platforms of it's category and quick draining cockpit make this boat unique. The brave, streamlined look & feel again appeal to friends of design and aesthetics.

Inspired by the success of the Magnum M5, the new Magnum E introduces a brand new, sporty but safe, and exceptionally seaworthy hull shape. The deep V angle aft, full bow and low centre of weight contribute to brilliant seagoing characteristics, without making the boat unstable while moored. Our low total displacement combined with optimal longitudinal distribution of weight peel out the sporty characteristics of this new hull. The Magnum E handles heavy seas and aggressive turns smoothly and with poise. The smoothness inspires driver confidence, and combined with an exceptionally rigid and silent structure paves way for a truly exhilarating driving experience. The wide engine rating (150-225hp) allows You to tailor a suitable boat-engine combination regardless of whether you value all round fun, economical commuting or watersports.

Besides being good looking, the new Magnum E is also practical. All in all there is over 1.000 liters of storage space - most of it in easily accessible areas like beneath the floors, the aft sofa and inside the consoles. Entry is particularly easy due to the walk through solution in the bow and stern. The stern area is exceptionally well sorted with industry leading bathing platforms and the unique retaining gate integrated into the aft sofa backrest. The door between the consoles is also truly an innovation featuring a one grip locking mechanism that facilitates everyday life onboard. The Magnum E has also been designed with Your well-being in mind - an easily stowed cockpit table acts as a social center while in port, and the optional fridge keeps your picnic ingredients fresh while under way. The new Magnum E - when style is paramount.

Buster XLe

A roomy GRP decked aluminium hull boat

The Buster XLe is a stylish and practical Buster E-series!

LENGTH 5,80 m / WIDTH 2,25 m / ENGINE POWER RANGE 60-100 hp / SEATING CAPACITY 7

BUSTER XLe IS BASED UPON THE ACCLAIMED XL HULL

6 decades of experience building aluminium boats is combined in the aesthetic look and feel as well as the versatile and practical lay-out of the XLe. The robust wrap around windscreen and fixed door protect passengers from wind and spray, while the voluminous and user-friendly canvas garage makes life easier in grim weather.

The XLe is the choice of the quality conscious boater who values practicality and overall economy. The wrap around glass windscreen with wipers contributes to comfort and safety. The noise insulated construction, ample stowage and rope lockers make boating a pleasure also for passengers. Grey anti-skid floors are practical regardless of whether you use the boat for fishing or other marine activities.

The wide power range and best in class, fixed 138 litre fuel tank gives you an unparalleled array of options from econo-

mical to performance oriented. Stainless steel deck hardware and an impressive list of standard equipment brings "Carefree Choice" to an entirely new style class in our boats E-series.

Buster Le

With room to spare

Uncompromising style in a compact package

LENGTH 5,07 m / WIDTH 2,05 m / ENGINE POWER RANGE 50-70 hp / SEATING CAPACITY 6

BUSTER Le IS BASED UPON THE TRIED AND TESTED BUSTER L HULL THAT HAS EARNED IT'S SPURS ON THOUSANDS AND THOUSANDS OF BUSTER L BOATS OVER THE PAST DECADE.

The Le introduces the look & feel made possible by a GRP deck – a stylish and aesthetic boat without compromising versatility and an open deck plan. The sturdy windscreen and fixed door between the consoles protect passengers from wind and spray, while the exceptionally easy to use canvas garage simplifies the boating experience in inclement weather.

The removeable seat/stowage boxes on the Buster Le enable the boat to be used as a commuter, fishing boat as well as for transportation. Overall economy and stylish design are already a given with all E-series Busters. The silent construction, ample stowage and integrated rope lockers make boat travel comfortable and pleasant for passengers as well.

The Buster L has been the most popular powerboat in the Nordic countries during the entire new millenium. The stable

handling, versatility and freedom given by the large, fixed fuel tank gives you an array of stylish multi-purpose boats. Stainless steel deck hardware and unparalleled standard equipment levels bring our promise: "Carefree Choice" to a new level in the Buster Le.

FACTORY OPTIONS

- NAVI 7 package**

*The speeds shown above are indicative and have been reached under testing circumstances. In reality, speed - especially top speed, varies heavily. Wave state, wind, propeller choice, engine installation height, trim angle, trim tabs, cleanness of bottom, amount of fuel and load state all affect boat speed. Thus, the performance data given is not to be treated as a speed guarantee.

** NAVI 7-package includes standard transducer without downVü/SideVü functionality.

Buster Magnum Pro

Supremacy in extreme conditions

Buster Magnum Pro for year round use

LENGTH 7,14 m / WIDTH 2,42 m / ENGINE POWER RANGE 150-250 hp / SEATING CAPACITY 6

BUSTER MAGNUM PRO IS THE STURDIEST BOAT IN THE RANGE.

The fact that it is over engineered, durable and seaworthy make it the professional choice. It is suited for year around boating, but is naturally also a competent choice for demanding leisure boaters.

The Buster Magnum Pro offers durability and performance for professional and recreational use almost year-round. The excellent balance and performance oriented hull design of this straightforward and spacious centre-console boat ensure a controlled and steady driving experience even at high speed. Driving is facilitated by the optional electro-hydraulic power steering system. Thanks to the large fuel tank and fuel-efficient hull design, the boat's operating range is up to 240 nm.

The Magnum Pro is designed for professional use. The design premises were performance, practicality and safety.

This model has it all: open corners aft facilitate fishing and moving around the boat. The targa arch leaves plenty of room for even large equipment. The 12" chartplotter comes standard. The hardened safety glass of the windscreen doesn't get scratched by the windshield wiper. This Buster is built for long trips.

NOVELTY

Buster XL Pro

For work and play on the water

Buster XLPro - a sturdy boat for demanding fun & work

LENGTH 5,94 m / WIDTH 2,17 m / ENGINE POWER RANGE 70-115 hp / SEATING CAPACITY 7

BUSTER XL PRO IS THE CHOICE OF THE DISCERNING BOAT OWNER.

As robust and unsinkable it is well suited for professional use in demanding conditions. With the versatile options and accessories You can equip the XL Pro according to Your needs, be they professional or related to serious fishing.

The new Buster XL Pro shares it's hull with the popular, acclaimed Buster XL. The new model has a traditional twin console lay out with a fixed door between the consoles. The generous storage spaces inside the consoles allow for stowing equipment and luggage. The new XL Pro is also designed with the fisherman in mind. The overall heavy dimensioning and anti-skid featuring full aluminium floorboards give you a safe, carefree platform at sea, regardless of weather.

It does not matter whether You use the boat professionally or recreationally, free mobility onboard is equally essential.

The open layout of the new Buster XL Pro gives You plenty of room for work, while facilitating transporting bulky cargo. The full aluminium floor is safe and durable for decades to come, and as all bigger Buster boats, the new XL Pro is stable and safe, on water and in port. The new Buster XL Pro - safety and stability on the water.

BUSTER ACCESSORY PACKAGES

With Buster's factory-installed optional equipment packages, you can have your new Buster equipped with the desired accessory right away.

It is also more economical to order equipment in packages, as opposed to buying and installing each piece of kit separately. The components of the equipment packages are Buster guaranteed in terms of quality and usability, and when factory installed by professionals you get the optimal end result. When you order a new Buster, you can select the equipment packages to be installed at the factory. Factory installation guarantees the functionality, usability and safety of the boat and its equipment from day one.

www.buster.fi you can build your own Buster. Click on the English flag in the upper left corner of the user interface for the English language version of the "Build Your Buster" online configurator

NAVI

You can choose from two different Garmin chart plotters, integrated (flush mounted) into the instrument panel and ready for operation.

The NAVI packages include chart plotter, compass, the necessary transducers and factory installation. With the NAVI PLUS package, you can add a fish finder feature to the 12" chart plotters.

COMFORT

The Comfort package includes model-specific seat and backrest cushions. For the largest boat models, the package also includes suspension seat posts for the driver's and navigator's seats.

The COMFORT package includes all upholstery and back rests for the boat.

ENTERTAINMENT

The Entertainment package is available for the largest Buster models. It includes a high-quality iPod, iPhone, iPad and Mp3 compatible audio system, speakers and an antenna.

PERFORMANCE

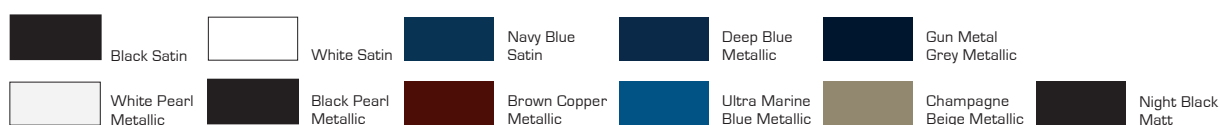

Due to the equipment included in the performance package you can optimize your hull position depending on load, speed, fuel economy and weather. At the same time you get a splash of professionalism into your boating experience.

The vertically adjustable steering wheel of the Performance package helps you ensure an ergonomically sound, comfortable driving position both while seated and when standing up. The trim tabs can be used to optimise the boat's manoeuvrability, performance, and trim.

CANVAS

The Canvas package includes a model-specific canvas, adjustable according to weather conditions for most Buster models. A protective cover or a separate canvas garage is provided for storage of the canvas top. For Buster M and L the package also includes a door between the consoles to provide protection against wind, spray and rain.

COLOR OPTIONS

Colours are reproduced as accurately as possible due to restrictions in printing technology.

You may order the boat, that has been painted with the same colour as the coloured side panel. Not available with E-series, Pro-series or Cabin boats. Antifouling-handling on the hull areas under the waterline is an option available for Buster model from the size class M on.

Buster reserves the right to change model, colour, trim, equipment and pricing without prior notice. Standard equipment may vary slightly from country to country. Brochures and web images display options and accessories that are not standard equipment. Performance data is indicative only. Ensure delivery contents from your local dealer.
